

J. Gary Gardner, AIA, LEED AP BD+C, CSI

Current Job: Industrial Marketing, Bayer MaterialScience. Involved in advancing new technologies and developing market intelligence. Works with architects, contractors and owners to solve wall and roof design problems, which include wall assembly performance and durability concerns and building envelope contributions to overall energy performance.

Gary practiced architecture for 30+ years, 18 as a firm owner. He designed and/or consulted on 30+ sustainably oriented projects since the inception of LEED. One such project was the Greater Pittsburgh Community Food Bank, one of the first four LEED projects ever completed. Another was the LEED Core & Shell Pilot Project, the Collaborative Innovation Center. He has served on US Green Building Council committees and as a board member of the Green Building Alliance. He has been a speaker at sustainable design conferences such as USGBC Greenbuild, conferences in China and various other events throughout the country. He was an early adopter of environmentally responsible design concepts such as the rain screen exterior building skin system, raised floor HVAC systems and low VOC materials.
