

Amy Wylie is the Buildings and Transportation Platform Leader for Covestro LLC in the Public Sector and Business Growth Services Division. She has vast experience in various Material Science disciplines and functions including coatings, plastics, and polyurethane materials. She is currently leading the efforts for government contracts, market intelligence and market development support for the buildings and transportation areas of the public sector. Wylie is also serving as Principal Investigator dedicated to the US Department of Energy funded Consortium for Building Energy Innovation. Her primary responsibilities include integration of roof and envelope systems into whole building integrated retrofit designs.

Amy received a Bachelor of Science Degree in Life Science from The Pennsylvania State University in 1998 and Bachelor of a Science Degree in Chemistry from The University of Pittsburgh in 2006. She joined Bayer Material Science in 1997.
